**TS47**

**TS30**

"Alcohol" labeled dispensers are available in plastic and amber glass spout top or plastic and amber dish top.

High Density Polyethylene automatic fluid dispensers seal contents in their bottle until used, increasing safety and comfort for user. These high grade bottles prevent spills, dripping, and escaping fumes. The liquid in this bottle will stay clean until used and fluid pumped into the dish will not drip back into the bottle, thus preventing contamination. Hinged lid protects dish when not in use.
